ARTWORK: We can work from clean, black and white art, a positive transparency, or a film negative. We can also do original art from a photograph or rough drawing at a cost of \$30/hr. Avg. charge is \$15-\$40. Half -tones don't work for branding, although some shading can be done with dots or parallel lines.

Keep lettering size above 3/32" in height, 1/8" high or larger if using serif style (Roman) lettering Outline lettering and other "fancy" styles may need to be larger. We recommend not using white images on a black background in most cases unless the white areas are large enough to stand out.

You can send or fax art to us for approval. We will inform you if your art will work well as a brand and recommend changes if needed. We do not normally work from faxed art as it is rather poor quality.

EQUIPMENT: WE offer the most reliable, heavy-duty equipment available. Our heavy bronze dies are a minimum of 1/2" thick (most are much thicker), and are interchangeable. Our engraving is .080" minimum depth on standard sizes and can be done deeper for extra charge. A **heat control** unit is recommended for all electric branders to insure good image reproduction and to prolong heater life.

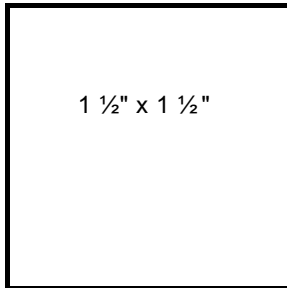

Drill press operated models are available for production branding. Listed below are our **most popular sizes** for **custom** electric and torch heated branders. Prices are listed for any signature, text or logo which will fit within the desired size. For **Hobby Branders**, see page 2. **Additional charges for:** heat control; drill press adapter; artwork; shipping.

5/8" x 2"

Engraving \$125
 250 Watt iron w/ blank die \$150
